How the estimate of distributor sales is obtained: Approximately 15,500 promotional products distributors companies are surveyed by researchers at Louisiana State University and Glenrich Business Studies. A point estimate (mean) is derived and multiplied by the number of small distributor companies (20,800). To prevent distortion, a census of the larger distributor companies is conducted and the sum of their sales is added to the sales volume of the smaller distributor companies to arrive at the sales estimate for the entire industry.

This annual estimate of distributor sales is sponsored by Promotional Products Association International and conducted by researchers at Louisiana State University and Glenrich Business Studies.
