

**CHILDREN'S PRODUCTS CONTAINING LEAD; LEAD PAINT RULE
TIMETABLE**

ACTION	DEADLINE
Lead Paint Ban at 16 CFR part 1303	November 12, 2008 (general conformity certification required for products manufactured after that date)
Laboratory Accreditation Procedures – Lead Paint Ban	September 22, 2008 (published in the Federal Register)
Laboratory Accreditation Procedures – Children's Metal Jewelry	December, 2008
Testing by Accredited Laboratory and Certification by Manufacturer - Lead Paint Ban	December 21, 2008 (third party testing and certification required for products manufactured after that date)
600 ppm – children's products may not contain more than 600 ppm of lead	February 10, 2009 (general conformity certification required for products manufactured after that date)
ASTM F963-07 – surface coating materials not including lead (antimony, arsenic, barium, cadmium, chromium, mercury, selenium)	February 10, 2009 (general conformity certification required for products manufactured after that date)
Testing by Accredited Laboratory and Certification by Manufacturer - Children's Metal Jewelry	March 2009 (third party testing and certification required for products manufactured after that date)
Laboratory Accreditation Procedures – Children's products other than Metal Jewelry subject to 300 ppm	May 2009
Laboratory Accreditation Procedures – Lead Paint Ban – 90 ppm	May 2009
Laboratory Accreditation Procedures – ASTM F963-07 (surface coating materials not including lead)	June 2009
300 ppm - children's products may not contain more than 300 ppm of lead	August 14, 2009 (third party testing and certification required for products manufactured after that date)
90 ppm – lead-containing paint must be reduced to 90 ppm	August 14, 2009 (third party testing and certification required for products manufactured after that date)
Guidance Rule – on product components/classes of components considered inaccessible	August 14, 2009 (and periodic review every 5 years of each new regulation)
Study on X-Ray Technology – to study effectiveness and alternative methods	August 14, 2009 (and periodic review every 5 years after study)
Electronic Devices – rule issuing requirements to eliminate/minimize accessibility of lead & compliance schedule.	No Specified Date but ASAP
Testing by Accredited Laboratory and Certification by Manufacturer (ASTM F963-07 surface coating materials not including lead)	September 2009 (third party testing and certification required for products manufactured after that date)
Laboratory Accreditation Procedures – Children's products other than Metal Jewelry subject to 100 ppm if technologically feasible	May 2011
100 ppm – children's products may not contain more than 100 ppm of lead <i>if technologically feasible</i>	August 14, 2011 (third party testing and certification required for products manufactured after that date)
